**Subject: Letter of Appreciation for making Anganwadi of Vadaliya Sihan a Model Anganwadi.**

We would like to express our deepest gratitude for your contribution to the Anganwadi of Vadaliya Sihan. Your work for making model anganwadi is very important to us and it is greatly accepted and appreciated.

Anganwadi provides many services like pre-school education, supplementary nutrition, nutrition and health education, vaccination, referral services to the villagers. The pre-school education is the main pillar of children's early education. Anganwadi center provides pre-school education to 3-6-year-old children of the village. Your organization painted the anganwadi so well that the children are attracted to come to the anganwadi. Your organization provided different games, sea-saw, slides, soft board, table-chairs, learning games and different types of posters which will help our Anganwadi Worker to give the best pre-school education to the children. Your organization donated pressure cooker, plates, spoons and other utensils which will help to provide hot cook meal to children efficiently.

According to NFHS-5 data 69% of adolescent girls in Gujrat are anemic. The hemoglobin test for anemia in adolescent girls is very important. The hemoglobin test system and weighing scale given by your organization will help to detect anemic adolescent girls and to calculate the BMI respectively which would help us to support in addressing the issue of anemia in this age group.

We appreciate and are genuinely grateful to your organization for being there to support our ICDS Department. Thank you so much for being such an example to our department and for inspiring us to work even harder to make a difference.
